In our journey which began more than 50 years ago, we replenish ourselves and grow. In addition to the four aluminium composite panel production lines, one slitting and one cut-to length lines, we continue to cover the reality with imagination on our coating line which give us unlimited flexibility for ACP production. While supporting the free choices of You, our precious partners with thousands of colors and designs which we have produced so far, we take the strength from our experience and technology. We are inspired by the nature and enable you to reflect its simplicity and brilliance in contrast, with modern touches.
